Professional Summary

Final-year Computer Science student with hands-on experience in Unity-based game development and web technologies. Passionate about crafting interactive experiences and solving real-world problems through code. Strong collaborator with a creative and detail-oriented mindset.

Education

Walchand Institute of Technology, Solapur
B.Tech in Computer Science and Engineering
CGPA: 8.7
2022 - 2026

Experience

Game Developer Intern, ASK Games IND
Feb 2025 - July 2025

- Working on multiple projects as a developer over a wide range of themes while collaborating with a team of diverse talents.
- Using Unity, C#, git, Blender 3D, LiberSprite, Audacity for developing games, its graphics and music.
- Worked as the sole programmer on a 2D platformer, doing my best to complete it within a tight 1-week deadline.

Projects

VR Space, a 3D VR Educational Project, Link
Role: Game Developer (Team of 3)

VR Space is a 3D VR educational project for exploring the solar system interactively. Developed UI-based interactions to display planetary data and historical exploration details. Designed an intuitive UI for seamless navigation and learning.

Strall, a 2D puzzle-platformer, Link

The **Strall** is a 2D puzzle-platformer where players control a ball with time manipulation abilities, solving platforming challenges to reach a star. Each level introduces new mechanics that require precise timing and creative problem-solving.

Movie Explorer — A React-Based Movie Discovery Platform, Link

Developed a web application that integrates the **TMDB API** to display trending, upcoming, and top-rated movies. Users can explore detailed information for each movie through an intuitive interface.

NeuroFractal — Story-Driven Cyberpunk Stealth-Action Game, Link
Role: Game Developer (Team of 3)
Built core gameplay, stealth mechanics, AI behaviors, puzzles, and UI in **Unity (C#)**. Collaborated with teammates specializing in narrative design and 3D art to create a cohesive experience.

Achievements

Secured 2nd place in the project competition and hackathon organized by **VVP College** for the **VR Space** project, recognized for innovation in educational VR applications.

Technical Skills

Programming Languages: Java, Python, C/C++, JavaScript, C# (Unity)
Frameworks/Technologies: Spring Boot, React, Unity, SQL
Tools/Platforms: Git, GitHub, Blender, Visual Studio, Audacity
Other: Game Development, Frontend Development, Cloud Basics

Certifications

Infosys Springboard
- Programming in C
- Python Introduction, Basics, Foundation
- Reinforcement Learning
- Artificial Intelligence Primer Certification

AWS Academy Cloud Foundations
Google Cloud Certification

Positions of Responsibility

Event Coordinator Volunteer — WITchar Event
Organized by Walchand Institute of Technology (2022 - 2026)
Supported event logistics by assisting across multiple tasks and ensuring smooth coordination between teams and participants in a fast-paced environment.

Interests

- Game Development with a focus on storytelling, gameplay mechanics, and user experience
- Playing games to analyze level design, pacing, and interactive storytelling techniques
- Story-Driven Movies & Series
- Classical Music
